Mastervolt B.V.
Snijdersbergweg 93
1105 AN Amsterdam
The Netherlands

To Whom It May Concern:

IMANNA Laboratory tested samples of Mastervolt ChargeMaster Plus 24/110-2 for ignition protection to SAE J1171:2016 and ISO 8846:2017, as well as the Electrical System Standard, Title 33 CFR, Part 183, Subpart I, Section 183.410 requirements. The results of this test are contained in IMANNA Report 21381-1, dated July 18th, 2019. Due to similarities in design, this certification also applies to the ChargeMaster Plus 24/80-2.

The battery chargers met the requirements of SAE J1171 and ISO 8846.

Sincerely,

Robert L. White
President
