MARPOL MEPC 63 Annex V Amendment

Re: MEPC 63/23/Add.1, Annex 24. RESOLUTION MEPC. 219 (63) Adopted on 2 March, 2012 & EC No. 648/2004

In "2012 GUIDELINES FOR THE IMPLEMENTATION OF MARPOL ANNEX V", under chapter Garbage Management, Page 4, the following statements are made:

1.7.4 While cleaning agents and additives contained in hold wash water, deck and external surface wash water are considered "operational wastes" under Annex V these are classed as "garbage". Annex V states that, these cleaning agents and additives may be discharged into the sea as long as they are not harmful to the marine environment.

1.7.5 A cleaning agent or additive is considered not harmful to the marine environment:

- 1) It is not a "harmful substance" in accordance with the criteria in MARPOL Annex III;&
- 2) It does not contain any components which are known to be carcinogenic, mutagenic or reprotoxic (CMR).

1.7.6 The ship's record should contain evidence provided by the producer of the cleaning agent or additive that the product meets the criteria for not being harmful to the marine environment. To provide an assurance of compliance, a dated and signed statement to this effect from the product supplier would be adequate for the purposes of a ship's record. This might form part of a Safety Data Sheet or be a stand-alone document but this should be left to the discretion of the producer concerned.

With reference to the fore mentioned IMO guidelines, Ecoworks Marine Ltd. have made the following statement:

We (Ecoworks Marine Ltd.) hereby declare that the listed products below, Ecoworks Marine Cleaning agents, are manufactured by us and meet the criteria for not being harmful to the marine environment as described under item 1.7.5

We will emphasise that this statement is not valid for chemicals put on the market with identical or similar product names manufactured by others. The name Ecoworks Marine must be mentioned on the product label and in the Material Safety Data Sheet.
