FOB THP

*The power
when and where
you need it*

Certified as High
Holding Power anchor
by the Bureau Veritas.

FOB THP

*The power when
and where you need it*

For more than 20 years FOB anchors have secured the lives of many boat owners by their efficiency, easy handling and reliability.

THE FOB THP ANCHOR

- A new concept
- A new design

Chock anchors

To store the anchor on the deck.

1 BETTER BALANCE

- A stock to increase stability when the anchor digs into the ground.

2 IMMEDIATE GRIPPING INTO ALL KINDS OF SEA-BOTTOM

The flukes and the shank are sharpened.

- To dig into the deepest and most compact part of the sea-bottom.
- To have a more effective mooring hold.

3 GREATER HOLDING POWER

- A hollow crown designed to facilitate complete burying in the sea-bottom.

Sea trials under the control of the Bureau Véritas have confirmed the perfect homogeneity of the FOB THP holding power on all kinds of sea-bottoms.
